Academic Honesty

(The Short Short Short Version)
What to avoid

• Don't reuse work
  – *Your* own (previous semester, previous course) without permission.
  – From *others*!
  – Content from web should be *cited*.

• A helper who hands you a solution is no help at all.
  – Get help by having someone look at your code and help you work through the problem.

• You CAN:
  – Use any code I publish this semester without citing.
  – Look at another student’s work to help *them*.
