<tbody>
<tr>
<td>Project Report</td>
<td>80%</td>
</tr>
<tr>
<td>Presentation of Report</td>
<td>20%</td>
</tr>
</tbody>
</table>

- Reference Books

- Assignments and Exams
  There is no assignment or examination in this course. The grade will be decided by the project report (80%) and presentation of the report (20%).

- Project Report
  The project reports should be prepared using LaTeX. The LaTeX style file will be provided.

  A detailed outline of the report is due at the end of the 6th week. The outline should contain the drafts for at least the sections of Introduction and Preliminaries.

  The 1st draft of a complete report is due at the end of the 9th week.

  A final version of the report is due at the end of the 12th week.

  The final version of the report for archive is due at the end of 14th week.

- Presentation of Report
  Each student is required to present the capstone project in 15-20 minutes. The presentations will be at the beginning of the 14th week.
• Academy Honesty

Students should respect the SFU intellectual honesty policies and code of student conduct (please refer to http://www.sfu.ca/policies/Students/index.html for details).

Submitted answers should be your own work. A student may receive zero credit for a work if the answer is substantially identical to that of another student or a known source. Violation of academic honesty may result in a more severe penalty than zero credit for a work.
